EXPERIENCE

Technical Product Manager | National Services Group (College Works Painting) | Irvine, CA — Jun 2026 to Present

Residential painting company run through a student internship program, operating in 12 states and hiring 2,000+ students each year.

- Sole product lead for the CWP platform, owning strategy, discovery, roadmap and delivery across business critical systems including payments, payroll, data integrations and operational workflows.
- Partner with the CEO and VP on product direction and trade offs; report delivery, risks and key decisions to the CTO.
- Defined requirements and epics for payments and payroll features, including E-Check payment infrastructure and Direct Deposit with Paychex export.
- Scoped third party property data integrations (RentCast, Datafiniti) to automate home age validation, recommending fuzzy address matching to reduce false negatives.
- Rescoped a stalled compliance penalty initiative into automation built on the existing safety inspection workflow.

AI Trainer (Contract) | LinkedIn | Remote — May 2026 to Jul 2026

- Evaluated and improved AI model responses on product management topics, including scaling and lifecycle transitions, feasibility assessment and technical planning.

Head of Product and Engineering | Repocket | Singapore (Remote) — Feb 2025 to Jan 2026

Bandwidth sharing marketplace app with 2M+ users that pays people for unused internet bandwidth, with an offerwall and referral rewards.

- Led a 12 person team across product, engineering, BI, operations, QA, DevOps and design; delivered the highest revenue period in company history.
- Led migration from GoKart to Affise and integrated 15+ external providers, implementing EPC based ranking logic that improved offer conversion and platform stability.
- Achieved 95%+ US traffic conversion efficiency through offer surfacing logic and traffic quality filtering.
- Redesigned onboarding and referral flows with push notifications and tiered rewards, growing DAU by double digits and improving 30 day retention.
- Cut release cycle time by 30% through sprint restructuring and workflow automation; strengthened payout reliability and fraud controls to protect net revenue.

Senior Product Manager and Scrum Master | 10 Minute School | Dhaka, Bangladesh — Feb 2022 to Jul 2024

Bangladesh's largest EdTech platform: 6.7M+ app downloads, 3.2M monthly active learners and 650K+ paid users.

- Owned B2B and B2C payment flows across web and mobile, improving transaction success rate and reducing checkout abandonment by 12%.
- Built and launched an IELTS mock test product contributing 40% of annual business unit revenue.

- Drove 23% YoY revenue growth through feature experimentation and engagement initiatives with a 31 person cross functional team.
- Led internal ERP, CMS, CRM and LMS tools used by 500+ academic staff; launched a live class platform, assessment engine and instructor dashboards.
- As Scrum Master for 3 teams, raised sprint completion from 75% to 92%; mentored 8+ product managers.

EARLIER EXPERIENCE

Product Manager | B-Trac Solutions (Ami Probashi recruitment platform) | Dhaka — Feb 2021 to Aug 2021
- Redesigned recruitment workflows connecting migrants, employers and agencies, raising client satisfaction scores by 22%.

Technical Product Manager | Evaly (ecommerce marketplace) | Dhaka — Jun 2020 to Jan 2021
- Led initiatives across 7 verticals including ecommerce, food delivery, logistics and finance with 30+ team members; cut time to market by 15%.

Software Support Engineer (Contract) | Google, Street View Geo Data Operations | Kuala Lumpur — Mar 2018 to Mar 2020
- Supported geo data platforms at 99.8% uptime; resolved production issues across distributed systems and improved troubleshooting efficiency by 10%.
- Partnered with global engineering teams on mapping and data integration products; trained new engineers.

Network Administrator | Brandt International | Kuala Lumpur — Mar 2017 to Nov 2017

Software Engineer Intern | HappyGD Technology (WeChat ecosystem) | Kuala Lumpur — Feb 2016 to May 2016
